Tiered Saucer

Unique multi-leveled structure comfortably accomodates both the teacup and the stir diffuser.

Doubles as an attractive display piece, with its high-gloss lacquer and chrome tubing construction.

Teacup

Rubberized finger grips allow for an easy 360° degree hold.

Inside grip prevents a teabag from floating up when steeping.

Stir Diffuser

Mesh gives users the option for loose-leaf tea.

Funnel easily deposits milk, honey, and sugar when needed.

Diffuser can be spun to improve water flow through the mesh.
